outline:

This course is designed for local English language learners who seek to improve their overall English listening and speaking skills, with the added benefit of enhancing their TOEIC performance. Recognizing the challenges faced by today ’ s EFL learners, this course aims to help students develop proficiency in listening, speaking, and professional communication in real-world contexts. Each week, we will practice conversations that focus on the sound and flow of natural English, followed by pronunciation exercises to improve speaking fluency. The listening and speaking activities connect classroom learning to real-life situations, making the skills practical. While we include some TOEIC-style practice, the main focus is on improving overall fluency and effective communication in English.
