課程大綱:

The Sustainable Universities: Global Practices on Sustainable Development Goals course is aligned with the UI GreenMetric strategy on sustainability. It is a unique global online course offered by top universities in four continents and seven countries to members of the UI GreenMetric World University Rankings Network. It gives students an understanding of the key challenges and pathways to sustainable development in Taiwan, Indonesia, Thailand, the Republic of T ü rkiye, Hungary, and Egypt.

outline:

The course is designed as an undergraduate-level introduction to the most challenging question facing our generation: how can the world evolve in ways that are socially inclusive, environmentally durable, and financially viable? The course discusses the complex interplay between the economy, social life, our planet's physical environment, as well as the consequences of human activities on the planet's environment and the solutions to face them. It contextualizes these challenges in different countries including Taiwan, Indonesia, Thailand, the Republic of T ü rkiye, Hungary and Egypt.

本科目教學目標:

By the end of the study, students will be able to: 1. Understand and analyze the complex interplay between economy, social life, and the planet's environment: Students will be able to identify and examine the intricate relationships between economic systems, social dynamics, and the physical environment within the framework of sustainable development. 2. Assess and propose strategies to address inequality, extreme poverty, and promote human rights and gender equality within the context of sustainable development. 3. Examine and analyze the challenges and opportunities associated with climate change,
